

Electric Motorbike For rentals

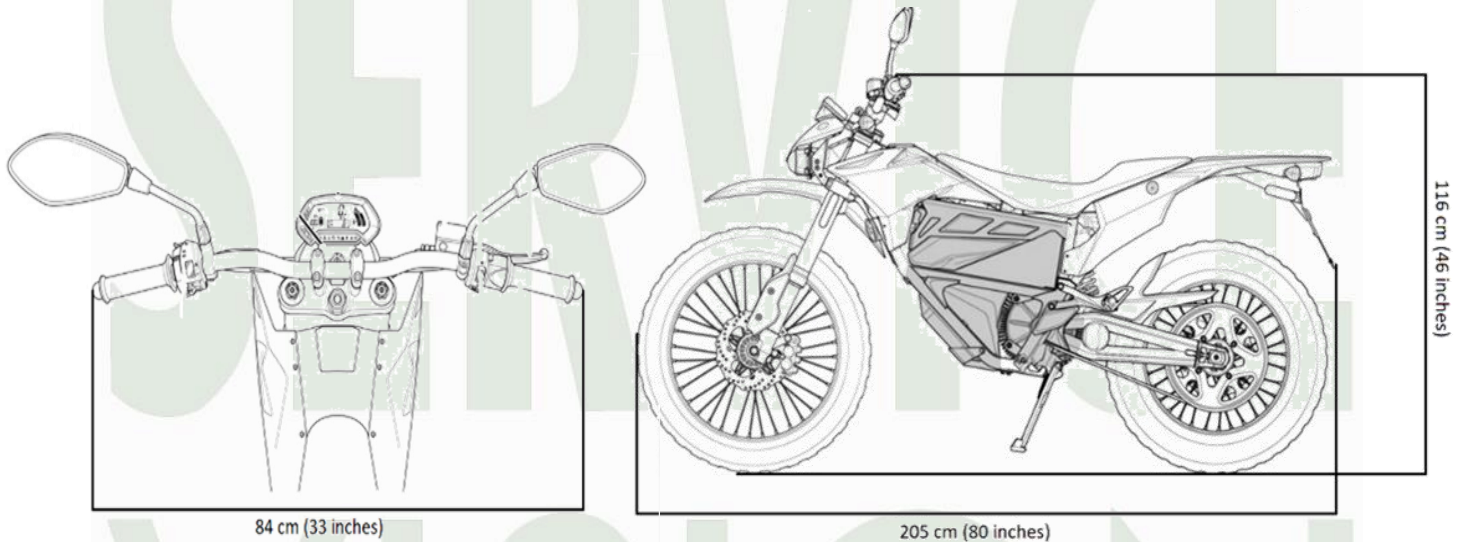

With the ***Electric Motorbike, Servicevision*** offers a versatile tool for use in any film production that requires a quiet combination of speed and precision in limited spaces. As it has an electric motor, it can be used both indoors and outdoors without any type of polluting emission and the possibility of using different tires allows it to work both on sets and on mountain roads with the same efficiency. The possibility of rolling with a remote head both on the front of the motorcycle and on the rear (or both simultaneously), having the center of gravity always within the axes of the motorcycle offers a great variety of possibilities, always offering maximum safety for the pilot and the rest of the team.

The design of the vehicle has been thought so that different types of remote heads can be used with different suspensions or the camera can be attached directly to the vehicle depending on the needs of each shoot.

Electric Motorbike

For rentals

Características:

Brand: Zero

Model: FXS

Dimensions:

205cm x 116cm x 84cm

Vehicle weight without camera or remote head

163kg (360lbs.)
